AquaNot 508 Active

This sump pump system takes over when the main power source is interrupted, or the primary pump is not working properly. The powerful Active smart-controller overcomes problems caused by dormancy and system neglect. Connect 24/7 on your phone with Wi-Fi through the new Z Control Platform!

mr.steam®

LINEAR STEAMHEAD

The revolutionary, patent-pending Linear SteamHead, with its sleek, slender, horizontal profile, disperses steam evenly, smoothly, and quietly, while remaining all but invisible. Unlike conventional steamheads that protrude into the room and deliver steam from a single exit point, the Linear Steamhead is set flush to the wall and contained almost entirely inside it.

NEW Rooftop Supports

For installation on most types of roofing material or other flat surfaces. Screw type fasteners can be used to attach strut or other applicable devices, such as pipe straps. This can also be used to dampen vibration without reducing the life of the roof. Water channels in base prevent damming.

Model PPDWHCUC1
Single Stage High Capacity
Carbon Filtration System

Comparable to 3M AP200. AVAILABLE NOW

This Watts Pure Water carbon filtration system connects to the cold side of your existing kitchen tap. It provides superior filtration for all the cold water to your faucet. The one-year or 10,000 gallon filtration capacity is five times the capacity of other competitive filter systems. It features a high flow 0.5 micron carbon block filter, simple quarter turn filter change out and simple under sink installation. This Carbon Block filtration reduces Parasitic Cyst, Sediment, Chlorine Taste and Odors. System comes complete with filtration system and all parts and tubing required for a standard installation. Installation is simple, only requiring standard household tools (requires phillips head screwdriver and an adjustable wrench).

Model PPDWLVC2
Under Counter Water
Filtration System

The 2-Stage LCV drinking water system produces high-quality, fresh water on demand by reducing unwanted tastes and odors from your incoming water supply. This system was designed for the Home, RV and Marine Industry where space is at a premium and quality water is essential.

Pure Water Cross Reference Guide

HOT BOX - THE ENGINEERED ENCLOSURE

Hot Box® enclosures are designed for backflow prevention assemblies installed outdoors, above ground, to allow code-compliant valve installations. From aluminum to fiberglass; from one-piece lift off to 24 piece, 2,000 square foot modular; from simple squares to artificial rock or treestump designs, Hot Box® is the industry leader in valve enclosure design and construction. Our wide variety of enclosures meet most standards and installation needs. From warm climate uninsulated Valve Guard® enclosures to cold climate insulated, heated Hot Box® enclosures, we have the enclosure you need.

Hot Box® enclosures are designed for backflow prevention assemblies installed outdoors, above ground, to allow code-compliant valve installations. From aluminum to fiberglass; from one-piece lift off to 24 piece, 2,000 square foot modular; from simple squares to artificial
